

AES Electro-Blast 100/9

Product Description

AES Electro-blast water blasters are built tough to last. Made in our Auckland factory, they are fitted with heavy-duty UDOR crankshaft driven triple ceramic plunger pumps, unloader valves and safety burst discs or safety valves. The Ravel electric motors are 4 pole heavy duty, low revving (1440 rpm) which results in less wear to the pump and lower maintenance costs. Pressure is fully adjustable, and chemical injectors are fitted to all units. The sturdy powder coated steel chassis have detachable handles for ease of transportation.

Output: Maximum 100 Bar (1450 psi), 9 L/min

Motor: 1.8kw (2.5 HP) 230 volt 50 hz, 4 pole (1440 rpm) Current 10 amps

Hose & gun: 10 Metre wire braided hose with quick couplers, gun c/w 900mm S/S lance & wash-jet

Weight: 32 kg.
