

SAFE COVER®

Our Fibreglass Safe Covers are designed primarily for use over trenches and holes on footpaths. Exceptionally rigid in construction, yet lightweight. Bevelled edges on all 4 sides make these ideal for footpath works.

Made from a single piece of reinforced composite fibreglass, moulded around a steel grid frame the Safe Cover can take a distributed weight of up to 500kg per cover.

BENEFITS:

- Lightweight and easy to use
- Slip resistant surface and bevelled edges to prevent tripping
- Low profile
- No machinery required to lift
- Distributed weight rating: 500kg per cover
- Can emboss with company name or logo for corporate identity

SAFE COVER 1200 x 800mm

CODE	DESCRIPTION
