

APH 6530

HYDROSTATIC VIBRATORY PLATE

CLIMBING AND PERFORMING

The APH 6530 is another powerful worker that delivers compaction force every step of the way. The plate is equipped with the market-leading Ammann three-shaft exciter system, which not only enables performance and climbing ability but also makes the machine more responsive and easier to handle for the operator. The AP 6530 weighs in at 491 kg. The optional ACE^{force} compaction measuring system is a key tool many contractors utilise in efforts to achieve thorough, efficient compaction results.

TRIPLE-SHAFT EXCITER SYSTEM

- Increases power and compaction forces.
- Keeps plate movement consistent for smooth travel.
- Performs well in heavy, cohesive soils.
- Climbs while backfilling saturated areas.
- Works on sticky ground.

INDUSTRY LEADER

- Unique Ammann triple-shaft exciter system overcomes grades between 30% and 35%.
- Ammann hydraulic plate compactors are the strongest machines in their class.
- Hydraulic pump enables smooth direction changes.

OPTIONAL TECHNOLOGY

- ACE^{force} monitors and can automatically adjust forces to provide efficiency and avoid damage caused by overcompacting certain areas.
- ACE^{econ} continuously measures and monitors the compaction level.

INNOVATIVE HANDLE

- Unique orbital system delivers great control with minimal effort.
- Vibration-isolated to reduce stress on the operator.

DURABLE, EASY TO MAINTAIN

- Best in class in servicability thanks to wide opening service hoods.
- Wear-resistant, self-cleaning base plate.
- Sturdy protection frame with central lifting point.
- Low maintenance costs because of fully hydrostatic drive and vibration.

APPLICATIONS

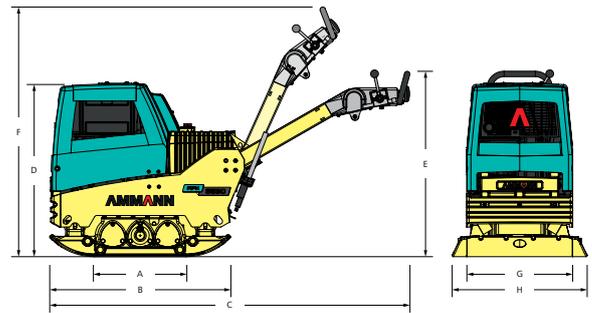

- Soil / earthwork
- Set paved roads / paving stones
- Trench work
- Road construction
- Foundation work
- Civil engineering
- Landscaping
