

REQUIRED SAFETY EQUIPMENT

SAFETY FIRST

If you are collecting the equipment for someone else please make sure this sheet is given to the equipment user to read. This sheet should be given to the site supervisor if the equipment is being hired for commercial use so that the information is available to all users.

Before starting any job, be sure to spend a few minutes planning and understanding the hazards and risks of the job. Do this by:

- Thinking about and observing your surroundings
- Running through the steps of the job in your mind
- Identifying the hazards, how you can get hurt and how you'll prevent it
- Knowing what plant and equipment you need
- Only starting when you can do the job safely
- Ensuring you are trained or experienced for the task
- Communicating with everyone involved

Points to consider when planning a task. Can you:

- Come into contact with an energy source (e.g. heat, electricity, substance under pressure) or hazardous materials
- Be struck-by or against anything?
- Be caught-in, on or between anything?
- Slip, trip or fall on the same or too a lower level
- Strain or sprain a muscle?
- Cause damage to plant equipment or property?
- Spill or pollute something?

Concrete Vibrator Cordless (Battery)

Instructions for Use

Pre-Start Checks and Safety

- Check for defects/damage to motor and the unit is clean
- Check for defects/damage to vibration shaft and spud
- Check the area of operation for hazards
- Make sure the unit is switched off before connecting the battery
- Make sure the flexi shaft and head are connected securely

When Operating

- Ensure all by standers and assistants are aware of work proceedings
- Ensure unit is held in a secure manner while operating
- Only switch on when ready to use in concrete. Switch off immediately after removing from concrete
- Do not bend the flexible hose excessively when the power tool is being used
- Always ensure a steady stance and control the unit

Starting Procedure

- Connect Battery to Concrete Vibrator
- Turn on the Concrete Vibrator

Stopping and After Use

- Turn off the Concrete Vibrator – wait until vibrations stop before putting on the ground
- Make sure the unit is cleaned of excess concrete. Avoid water on motor and electrical components

Charging

- Connect the charger's power cord to the receptacle
- Insert the battery into the charger
- Charging – When inserting a battery in the charger, the charger indicator lamp will blink blue, once fully charged, the indication lamp will light up green
- Disconnect the charger's power cord from the receptable
- Hold the charger firmly and pull out the battery
